Analytics Report

The data analytics included in the monthly board reports reflect the communication channels that EVC is utilizing to inform students.

You will see from the data that we are using social media to broadcast our message to the tune of 100,000 views a month and have another 250,000 views on our website. In addition we send out weekly emails to students that have expressed an interest or are currently attending EVC.

You can see from the report the most viewed posts each month, which gives you a snapshot of the content. By looking at the data on what students are clicking on, both on our website and through our eblasts, we can help predict and better serve the students' needs. We can see their interests not only in our programs but their academic field of study.
